

Ecommerce Site Design

Devon Blackman

Ian Brown

David Wu

I've published the design for the site [here](#).
Please feel free to look at it!

Notes

For now, business will be called "Bridge-IT"

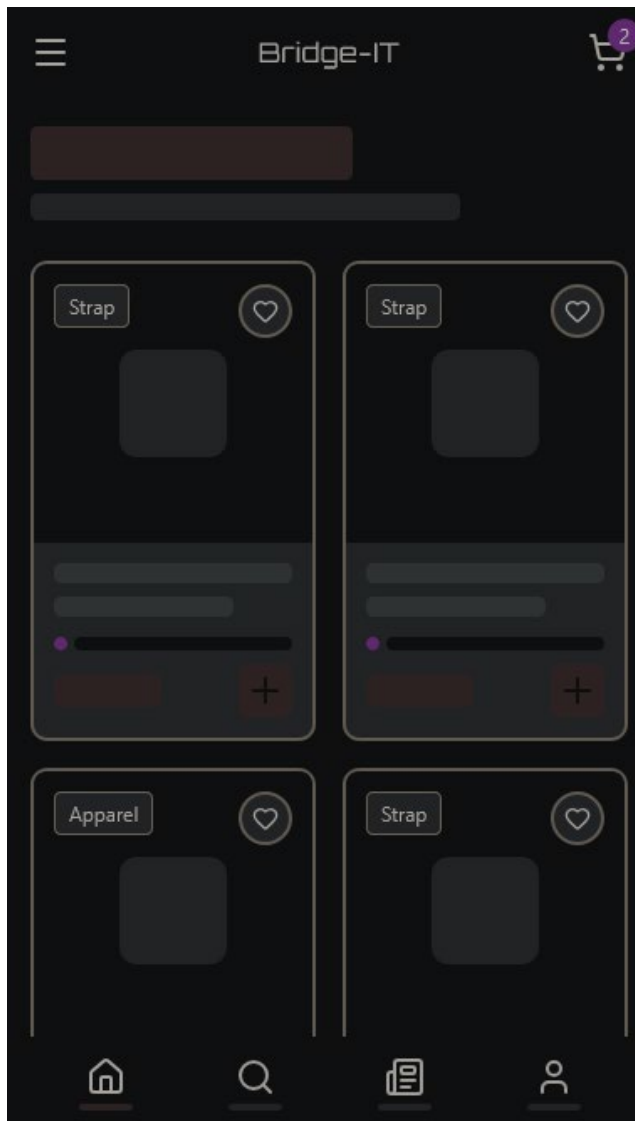

Hamburger button will offer extra options such as login/register, cart, news/articles, contact, etc.

Quick access bar for UX to feel as accessible as using an app, with search button for greater specificity in finding products.

Quick search buttons available above to give users a snapshot of what they can find.

Hero card with a mission statement (WIP). Featured and latest button are for what the business wants to show users such as latest drops or latest article on what the business is up to (research, etc.)

Cart with a separate accent color to stand out for user.

Product cards will have an image with a brief description and price.

Category button is available if user suddenly decides to only view a specific category.

Hearts will bookmark and be saved as suggestions on cart page (pending).

Plus button will quickly add item to cart.

Button to left of plus will allow users to change between different colors of the product.

Clicking on the product image will open the product page with expanded details.

Desktop design
